EDUCATION

MIT Academy of Engineering, Alandi, Pune *Bachelor of Technology, Computer Engineering*
2020 - 2024

SKILL SUMMARY

- **Software Intelligence:** AI Systems Architecture, Systems Orchestration, Deep Learning, Computer Vision, MLOps, Autonomous Logic, Full-Stack (React.js, Python, FastAPI, SQL).
- **Operational Interface:** Robotics Integration (AGV/6-DOF Arms), PLC Integration (Mitsubishi), Motion Control, Data Preparation & Analytics.
- **Tools & Technologies:** YOLOv8, Neural Networks, Docker, TensorFlow, PyTorch, Linux Systems, MediaPipe, AI-Augmented Development.
- **Strategic Leadership:** Project Management, Technical Strategy, Problem Solving.

WORK EXPERIENCE

April 2026 - Present Lead AI Systems Architect | Praisio Innovations

- **Rudraa:** Architected a microservices-based vision ecosystem (Python, YOLOv8, Docker, FastAPI), standardizing edge-AI deployment and high-speed inspection for Fortune 500 clients.
- Designed the centralized software "brain" for the Mobile Integrated Manufacturing System (MIMS), orchestrating AI perception with 6-DOF robotics and AGV protocols.
- Engineered deterministic, sub-millisecond synchronization for closed-loop feedback systems, achieving 0.01mm gantry precision by minimizing inference-to-execution latency.
- Established the technical roadmap and developed a custom, hardware-bound secure licensing architecture to protect proprietary AI assets.

Oct 2025 - March 2026 AI Systems Intern | Praisio Innovations

- Spearheaded a high-speed AI sorting pipeline for Hitachi, validating the architectural feasibility of deep learning for real-time industrial asset tracking.
- Performed rigorous performance profiling of YOLOv8 and MediaPipe architectures to define baseline latency and accuracy metrics for the core vision platform.

March 2024 - January 2025 Machine Learning Engineer | Sakar Robotics

- Architected and deployed advanced computer vision models, significantly enhancing system accuracy and operational performance.
- Built and managed robust data pipelines for preprocessing and augmenting large-scale image datasets for training resilient deep learning models.

August 2022 - January 2024 Developer | RedX MITAOE Club

- Contributed to the full software development lifecycle for multiple projects, authoring clean, scalable, and documented code for various software and web applications.

January 2022 - September 2023 Network Specialist | Chegg India

- Delivered high-level technical support, resolving complex network-related issues for an international client base.

June 2023 - July 2023 Frontend Developer | Intern Crowd LLP

- Developed responsive and user-centric web interfaces using React.js, HTML, and CSS to improve user engagement.

CERTIFICATION

- AWS Academy Graduate - AWS Academy Cloud Foundations
- Palo Alto Networks Cybersecurity Specialization
- Palo Alto Networks Network Security Fundamentals
- Network Security & Database Vulnerabilities
- Project Management Fundamentals
- Data and Analytics
